Super Micro to Review Hardware for Malicious Chips
Computer hardware maker Super Micro Computer Inc said it would review its motherboards for any proof of malicious chips as alleged in a recent media report. "Despite the lack of any proof that a malicious hardware chip exists, we are undertaking a complicated and time-consuming review to further address the article," the server and storage manufacturer said in a letter to its customers, dated ...

- Circuitnet daily e-mail subscribers 50,000 +
- 200,000 unique visitors in past 12 months
- Readership from 190+ countries
- #1 newsletter and website for industry professionals

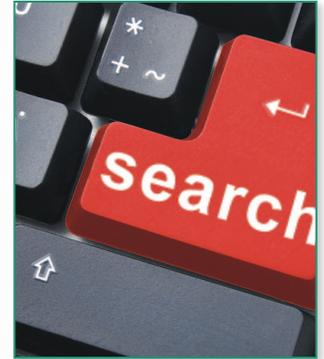

Electronic-media continues to expand as industry professionals seek daily updates on news and events shaping the electronics assembly market. An advertising campaign in Circuitnet provides excellent e-media visibility with high-frequency advertising designed to meet every budget. We reach 200,000 industry professionals who are eager to learn more about your products and services.

A digital advertising campaign in Circuitnet includes the following features:

- Lead generation and advertising in the daily newsletter & website
- Banner ads for branding (160 x 300 pixels vertical)
- Text ads intrigue readers to click to your web pages to learn more
- Technical papers provides lead generation for your sales channel
- Corporate news releases published daily at no cost
- "Ask the Experts" panel membership builds visibility for you and your company
- Calendar to post your shows, webcasts and important events
- Optional custom e-mail broadcast to our subscribers dedicated to your company

Analytical Data

Analytical data from independent firm confirms our readership continues to expand around the globe. The Circuitnet e-mail newsletter is broadcast to over 50,000 subscribers daily.

During the past 12-months Circuitnet has reached 200,000+ unique visitors from 190+ countries. The e-mail newsletter subscriber base is always up-to-date and is managed by an independent e-mail management company.

Top 10 markets by geographic readership:

- | | |
|------------------|-------------|
| ■ North America | ■ Singapore |
| ■ Germany | ■ Taiwan |
| ■ United Kingdom | ■ Korea |
| ■ China | ■ Japan |
| ■ India | ■ France |

Demographics by region of the world:
55% Americas, 25% Asia Pacific, and 20% Europe

IPC, SMTA and other industry organizations partner with Circuitnet to reach their members and drive visitors to their conferences and trade shows, shouldn't you?

In this period of decline in print publications, our users are turning to the internet in droves as the main source of information. Juki has benefited tremendously from our aggressive use of Circuitnet and Circuit Insight as advertising vehicles.

Bob Black, President
Juki Automation Systems

We were amazed at the response! The text ads keep the site fresh and the format is extremely effective at evenly distributing responses over the entire month. Bottom line: an awesome value!

Marc Peo, President
Heller Industries

Thank you for your thorough responses. Unbelievable detail which I greatly appreciate. Few partners today provide the hard data provided by your team. I appreciate all the great assistance, prime placements and total knowledge you folks have provided.

Barry Cohen, President
Launch Communications

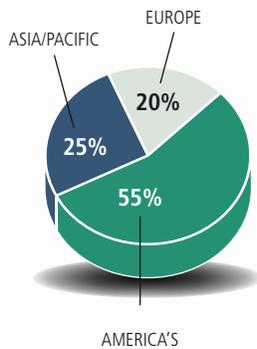

Over 50,000 daily subscribers find Circuitnet to be their go-to source for news and information in the electronics assembly market. Circuitnet subscribers and website visitors are the industry professionals you want to reach; they're your customers and prospects.

Rather than waiting for an issue of a trade publication every month or two, our daily broadcast reaches professionals that have a need to know – and who bear the responsibility for looking ahead to keep their companies on top! They keep themselves up to speed by reading Circuitnet daily. Over 1,000,000 articles have been clicked and read by Circuitnet readers.

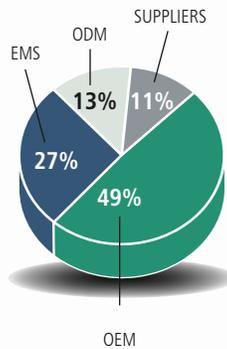

Based on a readership survey we are proud to share data and commentary from industry professionals who took part in our survey.

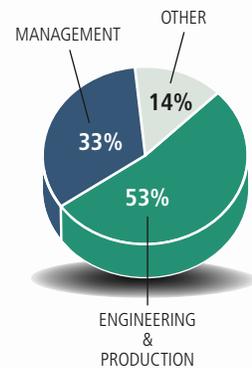

Readership Breakdown

Company Type

Job Description

The following are some of the commentary received from readers at major OEM and EMS firms.

"The Circuitnet newsletter is the one newsletter I actually look forward to reading everyday."

"Great way to start my day. Keeps me posted without having to surf."

"This is the only thing that I read regularly and I find the mix of information to be quite interesting."

"Find it very useful since it brings interesting article links from publications I normally don't have access to. Saves me the time required to scan magazines to find the meat."

"I think it is a great service. I like having electronic news assembled and delivered every day."

"Circuitnet is the best daily read."

Circuitnet advertising delivers results. We deliver your message to the largest electronic assembly readership daily. Sponsorship campaigns in Circuitnet provide more visibility compared to other media sources. The more often your ads run, the more response you will receive.

Banner Ads

Banner Ads are ideal for branding with corporate colors and company logo. Circuitnet's large banner ads (160 x 300 pixels) provide maximum exposure for your messages.

Text Ads

A well written text ad will intrigue the reader to click the ad to learn more about your product or service. The goal of a text ad is to deliver readers directly to your website. We encourage advertisers to run multiple text ads in their ad campaign at no extra cost.

Top Sponsor Position

Gold and silver-plus sponsors will have "text ad" at the top of the newsletter and website once each month. Company logo also appears in the top right column "Today's Sponsor" on the same day. Gold and silver-plus advertisers also receive premium positions each month.

Technical Papers generate leads each month

Circuitnet publishes relevant technical papers at no cost allowing readers to download them with a simple registration. We gather the name, company and e-mail addresses and provide to our advertisers at no additional cost.

Geo-Targeting

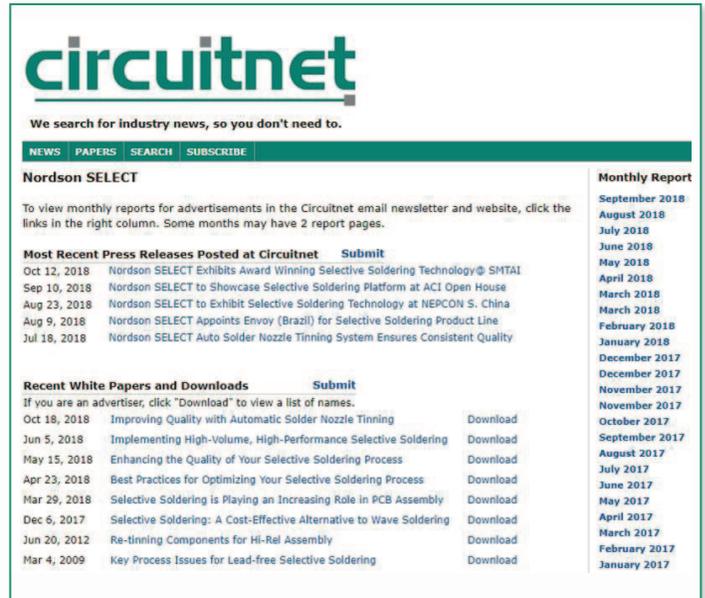

The geo-targeting feature allows your banner ads and text ads to be delivered to readers in a specific continent or country. A great method to reach a select group of readers to introduce a new product to a specific market, publicize a webinar or promote an award, ask for more details.

Custom Newsletter Broadcast

A custom newsletter broadcast to our subscribers can showcase new products, promote a webinar or conference or award. The custom newsletter e-mail broadcast will be focused exclusively on your company, ask us for more details.

Monthly Media Reports

Circuitnet provides a monthly media report capturing data from your campaign including banner ad and text ad impressions and clicks. We also gather the names of readers who download the published technical papers to share with your sales channel.

Did You Know: Text ads will typically deliver 2-3 times as many clicks as a banner ad. Advertisers use banner ads to build the company brand and text ads to drive readers to pages on their website.

The screenshot shows the Circuitnet website layout with several ad placements highlighted by lines and labels:

- Sponsor Text Ad:** Located at the top right, featuring a small image of a PCB and text about high-quality production.
- Sponsor Logo:** The JUKI logo with the tagline "LOWEST COST OF OWNERSHIP" is placed in the "Today's Sponsor" section.
- Premium Positions:** Two lines point to the "Super Micro to Review Hardware for Malicious Chips" and "Don't fear the pressure of IP69K" articles, which are positioned prominently on the left side of the page.
- Text Ad:** A line points to a "Best Practices for Optimizing Your Selective Soldering Process" article, which includes a small image of a soldering process.
- Vertical Banner Ads:** A line points to three vertical banners at the bottom of the page: "Indalloy 276 Solder Paste", "SCIENSCOPE THE WORLD'S FASTEST COMPONENT COUPLERS", and "JADE PRODEX Ultra flexible, offline, multi-platforms quick load turn PCB rotary table selective soldering system".

(Credit card pricing)

We believe it's our job to dig through the unending stream of news articles, features, and discussions to deliver information covering the world of electronics assembly to our readers. Every night we scour the news from 200 sources to find the best industry news articles. We package this information into a convenient newsletter that is delivered to our subscribers e-mail every business day.

We also publish the latest corporate and product news announcements our industry company's submit to us. We deliver thousands of technical paper downloads and our "Ask the Experts" panel answers intriguing industry process questions each week. You'll also find commentaries, cartoons, an industry event calendar and much more.

We look forward to working with you on a digital sponsorship campaign..
