EMIS to showcase EMI filter range at SPS 2026: global EMC solutions for industry

Nuremberg, Germany from 24 to 26 November 2026

Meet EMIS on booth 3-450

Cut The Noise with EMIS

Global EMC solutions provider EMIS will showcase key products from its wide range of EMI solutions at SPS 2026 in Nuremberg, from 24 to 26 November. Visitors can meet EMIS and its German distributor, Freicomp, on booth, 3-450.

SPS (Smart Production Solutions) is a leading automation industry event focused on innovations in digital and smart manufacturing technologies. It brings together over 1,000 exhibitors and thousands of trade visitors from around the world.

SPS 2026 will highlight electric drives and motion control, control technology and industrial communication—all markets where EMI mitigation is vital. Taking place at Messe Nuremberg, the show will emphasise practical solutions, emerging digital trends and forward-looking innovations in automation.

EMIS take great pride in solving their customer's EMI Challenges across the 50Hz to 40GHz frequency range with technologically superior products. EMIS continuously invest in developing, testing and pushing boundaries to build better products.

EMIS take great pride in solving their customer's EMI Challenges across the 50Hz to 40GHz frequency range with technologically superior products. EMIS continuously invest in developing, testing and pushing boundaries to build better products.

Markets served by EMIS include Industrial Technology, Medical and Healthcare, Building Technology, Telecommunications, Defence and Aerospace, Power and Energy, Automotive and Transit and Consumer Appliances.

EMIS EMI mitigation products include :

- EMI / EMC Filters
- Feedthrough Components
- Power Quality
- Surge Protectors
- Defence

In addition to representatives from EMIS, their German distributor German Distributor Freicomp will be supporting the exhibition and will be able to discuss design considerations for existing and future projects.

While at the show EMIS would welcome enquiries from representatives and distributors from across Europe to increase their market coverage.

EMI Solutions has been designing and manufacturing EMI filters for more than 40 years and is a global source for efficient EMI and EMC solutions across all industries, applications and the frequency spectrum.

EMIS aims to offer an end-to-end solution to meet industry's ongoing EMI Challenges. With a robust global supply footprint across eight industry segments, EMIS is continuously investing in technology and skills to deliver its promise of efficiency with seamless customer support.

Customers are supported by a very experienced consulting team, a fully equipped Pre-Compliance Lab and a huge safety certified standard product offering of over 2500 part-numbers produced in their own very efficient facility.
