

Press Release

A.R.T. Shortlisted for Three Instrumentation and Electronics Industry Awards

Advanced Rework Technology Ltd. (A.R.T.) has been shortlisted in three categories at the 2026 Instrumentation and Electronics Industry Awards, recognising the company's contribution to professional training, customer support and the wider electronics industry.

A.R.T. is a finalist for the Academic Support & Training Award and Best Customer Service Award, while Managing Director Debbie McDade has been nominated for the Electronics Industry Personality Award.

Debbie McDade said: "It is a great honour for A.R.T. to be recognised in three categories this year. Training and customer support have always been at the heart of what we do, so these nominations mean a great deal to the whole team.

"I am also personally delighted to be nominated for the Electronics Industry Personality Award. The electronics industry has changed considerably during my career, but the importance of developing skilled, knowledgeable people has remained constant. I am proud to play a part in supporting those people and the businesses in which they work."

A.R.T.'s nomination for the Academic Support & Training Award reflects its long-standing commitment to developing the knowledge and practical skills required throughout the electronics manufacturing industry. The company delivers the complete range of IPC training programmes at every level, alongside bespoke courses designed around customers' products, processes and workforce requirements.

Its training team is directly involved in the development of IPC standards, helping course delegates understand not only the requirements of the standards but also how to apply them effectively within their own manufacturing environments.

The Best Customer Service Award nomination recognises A.R.T.'s flexible approach to supporting electronics manufacturers. From scheduled and bespoke training to consultancy, inspection services and audit preparation, its team works closely with customers operating in sectors including aerospace, defence, medical, automotive and advanced manufacturing.

Voting is now open. To support A.R.T. in the 2026 Instrumentation and Electronics Industry Awards, visit: <https://iandeawards.co.uk/vote/>

Editor's Notes:

About Advanced Rework Technology Ltd (ART)

Since 1988, Advanced Rework Technology Ltd has been delivering IPC-certified training to engineers and manufacturers across the UK and Europe. A.R.T Ltd. was the first IPC training centre in the UK, and today remains the only provider authorised to deliver every IPC course at every level including Certified IPC Trainer (CIT), Certified IPC Specialist (CIS), Certified Standards Expert (CSE), Certified Interconnect Design (CID) and Certified Interconnect Design Enhanced (CID+). Many of today's training providers first trained with A.R.T LTD.

A.R.T's Ltd. trainers are directly involved in IPC standard development, ensuring customers benefit not just from certified training, but from the deeper insight that comes with being ahead of the curve when changes are made. A.R.T. Ltd. delivers high-quality training, product and process consultancy, inspection services, and audit preparation for companies across a wide range of sectors. As an IPC Authorised Distributor, A.R.T Ltd. also provides all required materials from IPC documents to assembly tooling.
