KOKI Europe to Highlight Advanced Soldering Materials at Evertiq Expo Gothenburg 2026

Zgierz, Poland – August 31, 2026 – KOKI Company Ltd., a global leader in advanced soldering materials, will participate in Evertiq Expo Gothenburg, taking place September 17, 2026, through its distributor, Matronic Electronic Production Technology. Visitors can meet the KOKI and Matronic team at **Booth #3**, where a selection of KOKI's lead-free soldering materials for electronics manufacturing will be highlighted.

As Sweden's largest one-day electronics industry expo, Evertiq Expo Gothenburg brings together electronics designers, manufacturers, suppliers and technology specialists to exchange knowledge and explore the latest developments across the electronics manufacturing industry.

At Booth #3, Matronic will highlight KOKI solutions including the S3X and S03X7CA lead-free solder wires and S3X58-HF1200 lead-free solder paste. These materials have been developed to support manufacturers seeking reliable soldering performance, stable production processes, and consistent quality across demanding electronics assembly applications.

KOKI representatives and the Matronic team will be available during the event to discuss soldering materials, process requirements and specific manufacturing challenges with visitors. Electronics manufacturers interested in improving soldering performance or evaluating materials for current and future applications are encouraged to visit **Booth #3** to discuss their process requirements with the team.

About KOKI

Founded in 1964, KOKI is a global leader in advanced soldering materials, focused on innovation, sustainability, and regulatory compliance. In addition to its materials portfolio, KOKI offers in-depth technical services and analytical support to help customers optimize soldering performance across a wide range of applications worldwide.
