Bridgeport & Polaris Feature Complete Project Solutions During 2026 NECA Convention

*From Planning and Specification Through Installation and Inspection,
NSI and its Brands are Committed to Helping Electrical Contractors
Work More Efficiently and Complete Projects with Confidence*

Huntersville, N.C., Sept. 16, 2026 – **Bridgeport and Polaris®** are proud to announce they will feature its new and enhanced project solution lines during the 2026 NECA Convention and Trade Show, held Oct. 5-7 at the Mandalay Bay Convention Center in Las Vegas, Nev., booth # 2707. Attendees will also have the chance to win daily prizes when they visit the booth.

**Visit us at NECA 2026
BOOTH #2707**

-more-

“NSI has led the electrical industry in overall value for more than 45 years because we never stop innovating,” said Joseph Saganowich, Chief Commercial Officer. “Our family of brands offers cutting-edge products that make your work faster, easier and better. We recently celebrated Bridgeport’s 100th anniversary, and Polaris recently expanded its manufacturing capacity to help ensure distributors and contractors have access to the compression solutions they require and trust, and are available on time.”

Bridgeport continues to expand contractor-focused solutions with innovations designed to make installations faster, easier and more reliable. During NECA 2026, Bridgeport will feature:

- E-Z Lock® with NEW E-Z Edge™ Technology
 - Engineered to provide smoother cable insertion, improved cable protection and easier installation while maintaining the secure performance electricians expect from Bridgeport.
- New 40ASP Range-Taking Snap-In Connector
 - One connector covers a wider range of MC cable sizes, helping reduce inventory while increasing installation flexibility.
- O.O.P.S.™ Solutions (Overcome Oversights with Proven Solutions)
 - Simple products that solve common jobsite mistakes before they become inspection issues or costly callbacks.

Bridgeport also proudly supports the next generation of electricians through its Platinum Level Partnership with the Electrical Training ALLIANCE—investing in training, education and the future of the electrical industry.

Trusted by contractors for decades, Polaris continues to lead the industry with compression connectors built for demanding commercial, industrial, utility and data center projects. During NECA 2026, Polaris will feature:

- Industry-Leading Tool Compatibility; Use the tools you already own.
 - Polaris Compression connectors are UL Listed with more than 35 major crimp tool models, including Milwaukee® Tool—providing flexibility while delivering code-compliant, inspection-ready connections.
- Built for Critical Projects
 - From switchgear and utility infrastructure to data centers and industrial facilities, Polaris delivers dependable performance where reliability matters most.

“NSI offers complete project solutions across our portfolio of some of the most respected and complete brands in the industry,” Saganowich added. “From data centers, commercial construction, and industrial facilities to utilities, prefabrication, and residential projects, industry integrators, contractors, and electricians rely on us to provide all the tools necessary to power, secure, organize, protect, and finish every installation, no matter the scope and scale.”

Also featured during NECA 2026 at booth # 2707 will be:

- TORK®; commercial timers, lighting controls, occupancy sensors, photocontrols, and smart controls designed to simplify installation while improving energy efficiency and reliability.
- Metallics; professional-grade fasteners, anchors, threaded rod, hardware, and installation accessories built to withstand demanding commercial and industrial jobsites.
- Slider; innovative wire pulling systems and accessories engineered to reduce installation effort, improve productivity, and make difficult wire pulls easier.
- PowerGRP®; professional cable ties, mounts, and wire management solutions that help organize, secure, and protect wiring in virtually any installation.
- WarriorWrap®; premium electrical tape engineered for dependable insulation, protection, identification, bundling, and everyday electrical maintenance in the field.
- Easy-Twist® & Terminator® Wire Connectors; A complete family of trusted wire connection solutions designed for fast installation, secure electrical connections, and dependable performance across residential, commercial, and industrial applications.

From planning and specification through installation and inspection, NSI and its brands are committed to helping electrical contractors work more efficiently and complete projects with confidence.

Whether you're looking for product recommendations, technical resources, installation guidance, or solutions for your next bid, NSI's Contractor Support program brings together the tools and expertise you need, all in one place.

About NSI Industries, LLC

NSI's core philosophy is *Making Connections*. Focused on the electrical and building technology markets, NSI connects distributors to products, services, and technologies by providing a fresh perspective and caring approach that drives smart solutions. The driving force behind a stable of market-leading brands and a large breadth of products, the company's primary job for more than 45 years has been to fulfill the needs of distributors and their customers. By staying grounded in the principles of service and value, NSI continues to deliver high-quality, industry-advancing, and comprehensive product solutions that enable growth.

NSI has many well-respected brands, including Bridgeport Fittings®, Polaris® Power Connectors, TORK® Timers and Controls, WarriorWrap® Professional Tape, TERMINATOR™ Premium Wire Connectors, Platinum Tools®, TechLogix Networx®, Metallics™ Fasteners, Remke®, ENET, and Lynn Electronics®.
