

CalcuQuote Strengthens Support for European EMS Manufacturers Through ECOMAL Integration

New API integration provides real-time access to pricing, availability and lead times, helping European electronics manufacturers streamline sourcing and quoting processes

DALLAS, TX – November 2026 – CalcuQuote, a provider of quoting and supply chain solutions for the electronics manufacturing industry, has announced a new API integration with ECOMAL, an established European distributor of electronic components. The integration expands CalcuQuote's connected supplier network and strengthens its support for electronics manufacturing services (EMS) providers across Europe.

ECOMAL serves customers throughout the European electronics industry, providing access to a broad portfolio of electronic components and supporting manufacturers with their sourcing and supply chain requirements.

Through the new API integration, CalcuQuote users can access real-time pricing, product availability and lead times from ECOMAL directly within their existing sourcing and quoting workflows.

For European EMS manufacturers, managing component availability, fluctuating pricing and changing lead times remains a significant challenge. Having access to accurate, up-to-date supplier information is essential for preparing competitive quotations, making informed purchasing decisions and responding quickly to customer requirements.

By connecting ECOMAL's supplier data with CalcuQuote's digital sourcing platform, the integration helps manufacturers reduce manual enquiries, improve visibility into component sourcing options and streamline their procurement processes.

"European EMS manufacturers need reliable, up-to-date supplier information to make faster and more confident sourcing decisions," said Kaitlyn Tredaway, Chief Operating Officer at CalcuQuote. "Our integration with ECOMAL strengthens our supplier connectivity in Europe and gives customers direct access to real-time pricing, availability and lead times. It's another important step in our commitment to helping manufacturers simplify sourcing, improve quoting efficiency and build more responsive supply chains."

The integration represents another step in CalcuQuote's continued expansion of its connected supplier network. By strengthening connectivity with established European distributors such as ECOMAL, CalcuQuote is helping EMS manufacturers access the information they need to make informed purchasing decisions, respond more quickly to customer requirements and manage increasingly complex supply chains.

CalcuQuote will be exhibiting at electronica 2026 in Munich, Hall C5, Stand 430**,** where visitors can learn more about its connected supplier ecosystem and solutions for electronics manufacturing.

About CalcuQuote

CalcuQuote delivers supply chain software built for electronics manufacturing. The platform provides operational intelligence for EMS providers, OEMs, and suppliers across sourcing, purchasing, and quoting in a single, connected system. With real-time supply data and seamless system integrations, CalcuQuote increases visibility, speed, and control across the entire supply chain. Founded in 2014, CalcuQuote serves hundreds of companies worldwide and is recognized as a trusted system for forward-thinking electronics manufacturers. CalcuQuote is a business unit of Elisa Industriq. www.elisaindustriq.com/calcuquote

About Elisa Industriq

Elisa Industriq creates software solutions for operational intelligence by multiplying industrial knowledge with AI innovation. Our businesses – camLine, sedApta, Polystar, CalcuQuote, TenForce, and Gridle – serve over 2,500 clients internationally in the manufacturing, telecommunications, and energy sectors.

Elisa Industriq delivers business value for customers by reducing costs, improving quality, and generating growth. Our software solutions integrate with customers' existing systems to optimize their operations in areas including manufacturing execution, supply chain optimization, network analytics, and energy management.

Elisa Industriq is part of Elisa, a pioneer in telecommunications and digital services headquartered in Finland. Our shared mission is a sustainable future through digitalization. Elisa Industriq employs over 1,500 experts in Europe, Asia, and North America. elisaindustriq.com

About Ecomal

ECOMAL is a fast-growing distributor of electronic components from well-known manufacturers. Our 280 employees want to make a difference every day – at our headquarters in Kirchzarten near Freiburg and our 18 companies worldwide. https://www.ecomal.com/en/
