

CalcuQuote Expands Support for Cable Assembly and Wire Harness Manufacturers Through IEWC Integration

New supplier integration strengthens sourcing connectivity and helps manufacturers streamline quoting and procurement processes

DALLAS, TX – November 2026 – CalcuQuote, a provider of quoting and supply chain solutions for the electronics manufacturing industry, has announced a new supplier integration with IEWC, a global distributor specialising in wire, cable and wire management solutions. The collaboration expands CalcuQuote's connected supplier network and strengthens its support for cable assembly and wire harness manufacturers.

IEWC supplies a comprehensive range of wire, cable and wire management products to original equipment manufacturers (OEMs), contract manufacturers and assemblers worldwide. Its extensive product portfolio and global distribution capabilities make it an important sourcing resource for manufacturers serving industries including automotive, aerospace and defense, industrial automation, medical and telecommunications.

By connecting IEWC with CalcuQuote’s digital sourcing ecosystem, the integration is designed to help manufacturers simplify supplier interactions and improve the efficiency of their quoting and purchasing workflows.

For cable assembly and wire harness manufacturers, sourcing can involve a wide variety of materials, specifications, and supplier requirements. Improving access to supplier information

within existing workflows can help estimating and purchasing teams reduce manual processes, respond more efficiently to customer enquiries, and make better-informed sourcing decisions.

“Cable assembly and wire harness manufacturers face unique sourcing challenges from managing diverse material requirements to meeting demanding production schedules,” said Kaitlyn Tredaway, Chief Operating Officer at CalcuQuote. “Our integration with IEWC brings specialist wire and cable distribution expertise into our connected supplier ecosystem, reinforcing our commitment to helping these manufacturers simplify sourcing, improve quoting efficiency and strengthen their supply chain operations.”

The integration also reflects a shared focus on supporting manufacturers with more efficient and connected procurement processes.

“Cable assembly and wire harness manufacturers depend on reliable access to the right materials to keep production moving,” said Jake Van Wormer, Director of Product Management at IEWC. “Working with CalcuQuote creates an opportunity to make sourcing more efficient by connecting our wire, cable and wire management offerings with the digital tools manufacturers use every day. This partnership is an important step towards helping customers simplify purchasing and respond more effectively to changing production requirements.”

The IEWC integration expands CalcuQuote’s ability to serve manufacturers with specialized sourcing requirements, particularly those involved in cable assembly and wire harness production. By bringing additional supplier connectivity into established quoting and procurement workflows, CalcuQuote continues to help manufacturers reduce sourcing complexity and improve operational efficiency.

CalcuQuote will be exhibiting at electronica 2026 in Munich, Hall C5, Stand 430, where visitors can learn more about its connected supplier ecosystem and solutions for electronics manufacturing.

About CalcuQuote

CalcuQuote delivers supply chain software built for electronics manufacturing. The platform provides operational intelligence for EMS providers, OEMs, and suppliers across sourcing, purchasing, and quoting in a single, connected system. With real-time supply data and seamless system integrations, CalcuQuote increases visibility, speed, and control across the entire supply chain. Founded in 2014, CalcuQuote serves hundreds of companies worldwide and is recognized as a trusted system for forward-thinking electronics manufacturers. CalcuQuote is a business unit of Elisa Industriq. www.elisaindustriq.com/calcuquote

About Elisa Industriq

Elisa Industriq creates software solutions for operational intelligence by multiplying industrial knowledge with AI innovation. Our businesses – camLine, sedApta, Polystar, CalcuQuote, TenForce, and Gridle – serve over 2,500 clients internationally in the manufacturing, telecommunications, and energy sectors.

Elisa Industriq delivers business value for customers by reducing costs, improving quality, and generating growth. Our software solutions integrate with customers' existing systems to optimize their operations in areas including manufacturing execution, supply chain optimization, network analytics, and energy management.

Elisa Industriq is part of Elisa, a pioneer in telecommunications and digital services headquartered in Finland. Our shared mission is a sustainable future through digitalization. Elisa Industriq employs over 1,500 experts in Europe, Asia, and North America. elisaindustriq.com

About IEWC

IEWC solves problems for the industries that power the world. Founded in 1962, IEWC distributes, manufactures, and engineers wire and cable products and solutions that keep customers productive, connected, and reliable. IEWC operates in 20 locations worldwide and is 100% employee-owned, a structure that drives its award-winning culture. Learn more at iewc.com.
