FOR IMMEDIATE RELEASE

CE3S and Desco Industries Host ESD Compliance Verification Training

HARRISBURG, PA — August 2026 — Cumberland Electronics Strategic Supply Solutions (CE3S), your strategic sourcing, professional solutions and distribution partner, in partnership with Desco Industries Inc., will host a two-session technical training program designed to help quality professionals, engineers, manufacturing technicians, consultants and sales specialists develop a practical understanding of electrostatic discharge (ESD) compliance verification. Titled “Hands-On ESD: The Working Pro’s Guide to TR53® Compliance,” the program will focus on the methods, equipment and measurement practices used to verify ESD control equipment and materials.

The live online training will be held October 13 and 14, 2026, from 1-2:30 p.m. EDT each day. Participants will be registered for both sessions.

The course is designed around the requirements of an effective compliance verification program, including identifying the technical requirements and ESD control items to be verified, establishing measurement limits and verification frequencies, documenting test methods and equipment, and maintaining records that provide evidence of conformity. These elements are identified as key components of a Compliance Verification Plan under ESD TR20.20-2016.

The training will provide practical instruction in electrical theory, test instrumentation, compliance measurement methods and troubleshooting corrective actions. By combining technical concepts with hands-on application, the program is intended to

give attendees the working knowledge necessary to conduct periodic verification of ESD protective equipment and materials and support ongoing factory compliance.

The course will address a broad range of ESD control and measurement standards and test methods, including ANSI/ESD S20.20, Protection of Electrical and Electronic Parts, Assemblies and Equipment; ANSI/ESD S1.1, Wrist Straps; ANSI/ESD S541, Packaging Materials; ANSI/ESD S6.1, Grounding; ANSI/ESD STM 15.1, Gloves and Finger Cots; ANSI/ESD SP15.1, In-Use Resistance Testing of Finger Cots and Gloves; and ANSI/ESD STM2.1, Garments.

Additional topics covered in the course include ANSI/ESD STM3.1, Ionization; ANSI/ESD STM4.1, Worksurfaces; ANSI/ESD STM7.1, Flooring Systems; ANSI/ESD STM11.11, Surface Resistance Measurement of Static Dissipative Planar Materials; ANSI/ESD STM11.12, Volume Resistance Measurements of Static Dissipative Planar Materials; ANSI/ESD STM12.1, Seating; and ANSI/ESD STM97.2, Voltage Measurement in Conjunction With a Person.

A well-defined compliance verification program is critical to maintaining an effective ESD control system. The course will help participants understand how verification requirements, measurement limits, frequency, test methods and equipment work together to provide documented evidence that ESD control measures continue to meet established requirements.

The program is particularly relevant for professionals who are responsible for ESD program implementation, quality and compliance, manufacturing processes, engineering, auditing or technical support. It also provides

valuable technical knowledge for consultants and sales specialists who work with ESD control products and solutions.

By focusing on practical measurement and verification techniques, the training is intended to help attendees move beyond simply understanding ESD requirements and develop the skills needed to apply those requirements within an operating manufacturing environment. Participants will gain greater familiarity with the equipment and methodologies used to evaluate ESD control items and document their performance.

Registration is free, but space is limited and closes October 7. To reserve your spot, register here: [Register for Hands-On ESD: The Working Pro's Guide to TR53® Compliance](#)

About CE3S

Established in 1962, CE3S has built a legacy as a trusted provider of quality goods and services. Our enduring presence, coupled with the wisdom of our seasoned employees, empowers us to introduce innovative ideas and practical solutions to your everyday procurement needs. With knowledgeable salespeople always ready to assist, CE3S offers an exceptional customer experience with no minimum order constraints, an extensive inventory for a wide selection, and invaluable assistance in part selection and cross-referencing.
