FOR IMMEDIATE RELEASE

Creative Electron to Spotlight TruView™ Prime SDX with Planar CT Technology at SMTA International 2026

SAN MARCOS, CA – September 2026 – Creative Electron, a leading manufacturer of X-ray inspection systems for electronics manufacturing, will showcase its **TruView™ Prime SDX** at **SMTA International 2026**. Visitors to **Booth 2741** will have the opportunity to see the company's latest benchtop X-ray inspection platform, featuring advanced planar CT technology designed to make high-quality 3D inspection more accessible to electronics manufacturers.

Following its soft launch earlier this year, the TruView™ Prime SDX will take centre stage at SMTA International as Creative Electron continues to expand awareness of the platform and its capabilities.

The TruView™ Prime SDX combines advanced planar CT imaging with a fully scannable 20" x 20" inspection stage for both 2D and 2.5D X-ray inspection. The system is designed to provide manufacturers with detailed visibility into hidden structures and defects while maintaining the compact footprint and ease of use expected from a benchtop platform.

Creative Electron is currently the only company offering this combination of planar CT capability, compact benchtop design and an accessible price point. The platform provides manufacturers with a practical route to advanced 3D inspection without the space requirements or investment typically associated with conventional CT systems.

"Manufacturers are looking for inspection solutions that deliver greater insight without adding unnecessary complexity," said **Dr. Bill Cardoso, CEO and Founder of Creative Electron**. "The TruView™ Prime SDX brings advanced planar CT technology into a compact benchtop platform, making high-quality 3D inspection more practical and accessible for a much wider range of electronics manufacturers."

Visitors to Booth 2741 will have the opportunity to learn more about the TruView™ Prime SDX, discuss inspection challenges with the Creative Electron team and discover how planar CT technology can support quality assurance, process development and failure analysis.

Dr. Bill Cardoso will also be available during the show for interviews to discuss the technology behind the platform, the growing demand for accessible planar CT inspection and Creative Electron's vision for the future of X-ray inspection.

About Creative Electron

Creative Electron is a U.S.-based manufacturer of advanced X-ray inspection systems serving industries including electronics manufacturing, medical devices, aerospace, defence and research. Its product portfolio ranges from benchtop inspection systems to fully automated inline solutions, helping manufacturers detect defects, improve quality and make faster, data-driven decisions through innovative X-ray imaging technologies.
