DISTRON Corporation Wins Global Technology Award for Contract Manufacturing Excellence

North Attleboro, MA — October 2026 — DISTRON Corporation, a leading U.S.-based electronics contract manufacturer, has received a 2026 Global Technology Award in the Contract Manufacturers $15–50 Million category. The award was presented during the Global Technology Awards ceremony held on Tuesday, October 27, 2026, at SMTA International in Rosemont, Illinois.

The Global Technology Awards recognize companies demonstrating excellence, innovation, and leadership in the printed circuit assembly and electronics manufacturing industries. DISTRON was recognized for its ability to deliver comprehensive contract manufacturing services while combining advanced production capabilities with the flexibility, responsiveness, and personalized service of a smaller manufacturing partner.

From new product introduction and PCB assembly through electromechanical assembly, box build, inspection, testing, supply chain management, and fulfillment, DISTRON provides customers with end-to-end manufacturing support. The company operates a 50,000-square-foot manufacturing facility with four SMT lines capable of more than 100,000 placements per hour, while its in-house engineering and program management teams support customers throughout the product lifecycle.

“We are honored to receive this Global Technology Award recognizing our contract manufacturing capabilities,” said Rob Donovan, CEO of DISTRON Corporation. “This award is a reflection of the commitment our team brings to every customer and every program. We have built our business by combining advanced manufacturing technology and engineering expertise with a responsive, partnership-driven approach, and we remain focused on helping our customers achieve their goals from prototype through production.”

Founded in 1970, DISTRON Corporation is a family-owned electronics contract manufacturer with more than five decades of industry experience. The company serves customers in markets including medical, defense, clean technology, industrial electronics, lighting, and robotics, providing flexible manufacturing solutions backed by a focus on quality, precision, reliability, and customer service.

Since 2005, the prestigious Global Technology Awards have recognized the absolute best new innovations in the printed circuit assembly and packaging industries. It brings together the global SMT and advanced packaging industry in a celebration of the companies and people that are achieving the highest standards and driving our industry forward.
