Entrepix Appoints India Handotai as Representative in India

New Partnership Strengthens Local Support for CMP Equipment, Wafer Cleaning Systems, Parts, Upgrades and Process Development

PHOENIX, AZ, September 10, 2026 — Entrepix, Inc., a globally recognized expert in chemical mechanical planarization and wafer cleaning and a subsidiary of Amtech Systems, Inc., today announced the appointment of India Handotai as its representative in India.

Under the agreement, India Handotai will represent Entrepix's portfolio of CMP and wafer cleaning solutions, including replacement parts, equipment upgrades, process development and foundry services, and the DSS-200 double-sided wafer cleaning system. The partnership will give customers in India a local point of contact supported by Entrepix's applications, engineering and customer service resources.

  <i>New Partnership for Sales in India</i>	India Handotai supplies materials and solutions across semiconductor manufacturing and packaging, serving wafer fabs, device fabs, OSAT/ATMP companies and adjacent electronics manufacturing operations. Its portfolio spans raw materials, consumables, machines and spare parts.
---	--

“India’s semiconductor manufacturers are building new capabilities across wafer fabrication, device manufacturing and advanced packaging,” said Jason Brown, Vice President and General Manager of Entrepix. “The appointment of India Handotai strengthens our ability to support these customers locally while giving them access to Entrepix’s equipment knowledge, process development capabilities and practical problem-solving expertise.”

Entrepix provides CMP replacement parts and upgrades designed to offer manufacturers a cost-effective alternative for maintaining and improving installed equipment. The company also operates a CMP foundry that supports process development and wafer planarization and

manufactures the DSS-200 double-sided wafer cleaning system for semiconductor and advanced substrate applications.

“Entrepix brings together equipment, process development and lifecycle support capabilities that are highly relevant to India’s developing semiconductor manufacturing base,” said Keshav Padia, Chief Evangelist, Handotai India Pvt Ltd, and VP, Group Strategy & Partner Management, Padia Enterprises. “This partnership enables India Handotai to connect customers with proven CMP and wafer cleaning solutions, while also giving manufacturers access to the technical insight and applications support needed to successfully develop and scale their processes.”

The partnership is intended to improve customer access to Entrepix technology and expertise for applications including silicon carbide, compound semiconductors, photonics, MEMS and other advanced semiconductor and substrate technologies.

About Entrepix Inc.

Entrepix Inc., a member of the Amtech Group, is a global leader in CMP solutions, offering parts, upgrades, process development and wafer cleaning systems. Its high-quality replacement parts provide customers with reduced cost, accelerated delivery and enhanced reliability. Entrepix also operates a state-of-the-art CMP foundry for advanced process development and wafer planarization. The company manufactures and sells the DSS-200 double-sided wafer cleaning system for semiconductor and advanced substrate applications. Headquartered in Phoenix, Arizona, Entrepix supports customers across the United States, Asia and Europe. Learn more at www.entrepix.com.

About India Handotai

India Handotai is an end-to-end semiconductor materials partner supporting wafer fabs, device fabs, OSAT/ATMP operations and adjacent electronics manufacturing markets. The company supplies semiconductor manufacturing and packaging materials, consumables, equipment and spare parts sourced from global technology providers. Based in Faridabad, Haryana, India Handotai emphasizes application-focused recommendations, technical insight and global sourcing capabilities. Learn more at India Handotai.
