

FOR IMMEDIATE RELEASE

Fuji America to Demo Smart Factory Placement Technologies for the Future of Electronics Manufacturing at SMTA International 2026

Vernon Hills, IL September 2026

Fuji America Corporation will exhibit at SMTA International 2026, taking place October 27–29 at the Donald E. Stephens Convention Center in Rosemont, Illinois. At Booth #2829, Fuji will showcase its latest SMT placement solutions, including the NXTR S and AIMEXR platforms.

The exhibit will highlight Fuji’s Smart Factory “R” Series technologies and demonstrate how its placement platforms are designed to support the changing needs of electronics manufacturers. With increased demand for product variation, shorter production cycles, and greater automation, manufacturers require equipment that can deliver both flexibility and consistent performance.

The **NXTR S** is a modular SMT placement platform designed to provide high accuracy, flexibility, and reliable operation in modern production environments. Its scalable design allows manufacturers to configure systems based on their production requirements while maintaining the ability to adapt as those needs change.

The **AIMEXR** is designed for high-mix manufacturing environments where flexibility and quick changeovers are essential. Supporting a wide range of components and applications, AIMEXR helps manufacturers manage diverse production requirements while maintaining efficient throughput.

Fuji will also highlight its approach to smart manufacturing, combining advanced placement equipment with intelligent automation and production management technologies. These solutions provide manufacturers with greater control over their operations and support efforts to improve productivity and quality on the factory floor.

Visit Fuji America at **Booth #2829** during SMTA International 2026 to learn more about the NXTR S, AIMEXR, and Fuji's latest SMT placement technologies.

About Fuji America Corporation

Fuji America Corporation is a recognized leader in SMT pick and place solutions and smart factory automation. The company is committed to advancing modern manufacturing through high speed, high precision placement machines and intelligent software. With decades of innovation in vision processing and part recognition, Fuji's robotic electronic component mounters continue to set industry standards for quality, performance, and reliability.
