FOR IMMEDIATE RELEASE

Green Circuits Appoints David Kim as Vice President of Quality

SAN JOSE, CA — November 2026 — Green Circuits, a full-service electronics manufacturing services (EMS) partner to leading OEMs in aerospace and defense, medical and health technology, industrial electronics, and semiconductor and AI hardware markets, has appointed David Kim as Vice President of Quality. Bringing more than 30 years of experience in quality management, manufacturing engineering, and operations, David will support the company's continued focus on quality, process excellence, and customer satisfaction.

David joins Green Circuits with extensive leadership experience across the aerospace, defense, medical, and commercial manufacturing industries. Most recently, he served as Vice President of Quality and Technical Services at PARPRO Technologies, where he oversaw quality assurance, supplier quality, manufacturing engineering, and technical operations.

Throughout his career, David has held quality leadership and engineering positions supporting complex electronics and aerospace manufacturing programs. His background also includes leadership roles at Alatus Aerosystems, Bardex Corporation, and L-3 Communications Power Paragon, where he developed broad expertise in quality systems, manufacturing processes, and operational performance.

"Quality is fundamental to everything we do at Green Circuits, particularly as we support customers with increasingly complex and demanding manufacturing requirements," said Adam Szychowski, Chief Revenue Officer at Green Circuits. "David brings a strong combination of technical expertise, operational leadership, and deep quality management experience. His background will be a valuable asset as we continue to strengthen our processes and deliver the consistency and reliability our customers expect."

In his new role, David will help guide Green Circuits' quality organization, supporting the company's manufacturing operations and ongoing efforts to maintain rigorous quality standards. His experience across multiple highly regulated and performance-driven industries will further strengthen the company's ability to meet customer requirements and support complex electronics manufacturing programs.
