Green Circuits Wins Global Technology Award in Contract Services

SAN JOSE, CA — October 2026 — Green Circuits, a full-service electronics manufacturing services (EMS) partner to leading OEMs in aerospace and defense, medical and health technology, industrial electronics, and semiconductor and AI hardware markets, has been recognized with a 2026 Global Technology Award in the Contract Services > \$100 Million category. The award was presented during the Global Technology Awards ceremony on Tuesday, October 27, 2026, at SMTA International in Rosemont, Illinois.

The recognition marks Green Circuits' fourth consecutive year receiving a Global Technology Award, further highlighting the company's commitment to technical excellence, quality, responsiveness, and customer service.

Green Circuits specializes in supporting customers with low- to mid-volume, high-complexity PCBA requirements, where speed, engineering expertise, flexibility, and quality are critical. Its quick-turn approach enables OEMs in aerospace and defense, medical and health technology, industrial electronics, semiconductor and AI hardware, networking, and other demanding markets to move products efficiently from new product introduction (NPI) through production.

The Global Technology Awards recognize companies that exemplify excellence in electronics manufacturing through innovation, quality, and operational performance. Green Circuits earned this year's recognition through its continued investment in advanced manufacturing technologies, engineering expertise, and customer-focused services, along with its ability to deliver responsive, high-quality solutions for complex electronics requirements.

"We are honored to receive our fourth consecutive Global Technology Award and particularly proud to earn our first recognition in the Contract Services category," said Adam Szychowski, Chief Revenue Officer. "This year's recognition is especially meaningful as we moved into the >\$100 million revenue category, representing a significant step up in the level of competition. To earn this award alongside some of the industry's largest and most respected companies is something our entire team should be incredibly proud of. Green Circuits has built its business around helping customers solve complex PCBA challenges quickly and reliably. Our focus on low- to mid-volume, high-complexity, quick-turn manufacturing allows us to provide the responsiveness and technical support our customers need while maintaining the highest standards of quality. This award reflects the dedication of our entire team and the trust our customers continue to place in us."

With more than 30 years of experience, Green Circuits provides comprehensive engineering, supply chain, testing, assembly, and system integration services for complex, high-reliability electronics. The company's focus on speed, service, technical expertise, and quality enables it to serve customers whose products require a high degree of manufacturing expertise and responsiveness.

Since 2005, the prestigious Global Technology Awards have recognized the absolute best new innovations in the printed circuit assembly and packaging industries. It brings together the global SMT and advanced packaging industry in a celebration of the companies and people that are achieving the highest standards and driving our industry forward.
