Indium Corporation Names Sue Sun-LaSovage Global Vice President of Human Resources to Lead Next Phase of Growth

CLINTON, N.Y., November 16, 2026 — Recognizing the critical role employees play in its success, Indium Corporation today announced the appointment of Sue Sun-LaSovage to Global Vice President of Human Resources.

Sue Sun-LaSovage

Dawn Roller

In this newly created role, Sun-LaSovage will oversee all global HR strategy and operations, bringing greater consistency, clarity, and connection across the company's manufacturing and sales regions while strengthening the overall employee experience worldwide. She will lead Indium Corporation's global HR team, overseeing recruitment, management, and learning and development in support of the company's overall growth.

Sun-LaSovage brings nearly 30 years of experience in organizational development, employee engagement, and HR strategy. Her career spans the U.S., China, and Singapore, where she led HR efforts for several manufacturing and automotive companies, most recently as Chief Human Resources Officer at Momentive Technologies, a semiconductor materials manufacturer with nine facilities worldwide. She also held senior HR leadership positions at Hyzon Motors, SRG Global, and SC Johnson, partnering closely with executive teams to design and implement talent and culture strategies that drive business growth.

Sun-LaSovage has a bachelor's degree in mechanical and optical engineering from Huazhong University of Science and Technology and a master's degree in HR and industrial relations from the University of Minnesota Carlson Business School.

“Our growth is accelerating and expanding globally in meaningful ways,” Ross Berntson, Indium Corporation President and CEO, said. “As Sue Sun-LaSovage and her HR team lead us into this next phase, we are evolving our organizational structure to strengthen global alignment, enhance the employee experience, and position ourselves as an employer of choice.”

Central to this next phase is the promotion of Dawn Roller into the role of Corporate Associate Vice President. In this position, Roller will lead critical corporate functions essential to this evolution, including Enterprise Risk Management, Government Relations, and Security.

During her four-decade career with the company, Roller has been instrumental in supporting the early growth of Indium Corporation’s international presence and the creation of multiple global facilities and sales regions. She has played a key role in establishing and advancing essential programs that strengthen Indium Corporation’s workforce, from recruiting initiatives and an award-winning internship program to employee engagement efforts and community-focused activities.

About Indium Corporation
