Inovaxe's Innovative InoHD Wins Mexico Technology Award

Boca Raton, FL — September 2026 — Inovaxe, a world leader and provider of innovative material handling and storage systems, announces that its InoHD High-Density SMT Storage System won a 2026 Mexico Technology Award in the category of Storage Systems. The award was presented during a ceremony held at SMTA Guadalajara 2026 on Wednesday, October 7, 2026, in Guadalajara, Jalisco, Mexico.

InoHD™ redefines SMT material storage by combining servo-driven mobile shelving with Inovaxe's proprietary smart sensing and pick-to-light technology. Its innovative zero-aisle design eliminates traditional stockroom layouts, enabling operators to retrieve reels in less than four seconds and return them in under eight seconds while automatically verifying inventory in real time.

Designed to maximize productivity and floor space, InoHD™ stores up to 10,560 SMT reels in just 32 square feet (3 square meters). By centralizing inventory and minimizing operator travel, the system can reduce material handling labor by up to 80 percent while supporting the speed and flexibility required for today's high-mix, high-volume manufacturing environments. Manufacturers typically achieve a return on investment within three to six months.

Integrated smart sensing and pick-to-light guidance help eliminate picking errors, improve inventory accuracy, and reduce production downtime caused by misplaced materials. The modular system is available in single- or double-entry configurations, integrates with MES and ERP platforms, and scales easily as production requirements grow. Engineered with fewer moving parts, InoHD™ delivers exceptional reliability while simplifying maintenance and ensuring continuous access to components, even during unexpected power interruptions.

“We designed InoHD to fundamentally change the way manufacturers think about SMT material storage,” said Ben Khoshnood, CEO. “Instead of simply storing reels, InoHD creates an intelligent, automated material management system that saves valuable floor space, accelerates production, improves inventory accuracy, and delivers measurable ROI. We’re honored that the Mexico Technology Awards recognized the innovation and value this solution brings to electronics manufacturers around the world.”

The Mexico Technology Awards recognize the most recent technological innovations in Mexico's manufacturing landscape, spotlighting achievements by OEM manufacturing equipment and materials suppliers over the past year. For more information about the awards, please visit:

About Inovaxe Corp.

Inovaxe Corporation is focused on delivering innovative ultra-lean SMART production and inventory management solutions to the electronics industry. The Company's product offering includes mobile InoAuto Smart carts (IA series), Smart racks (SR series), Line Side racks (LS Series) and Smart stationary racks (SREX series) to store SMT reels, tubes, trays, cut tape and loose parts. We provide a Smart MSD cabinet (IMSD) for moisture sensitive device storage and a Smart stencil rack storage solution (SRS series). We offer a material planning/kitting management tool with our InoAuto inventory management software for storing, locating and picking components.

For more information and a demonstration of Inovaxe product offerings, visit www.inovaxe.com.
