FOR IMMEDIATE RELEASE

Inovaxe to Feature LS350 Line Side Smart Rack for Streamlined Material Handling and Improved SMT Production Efficiency at SMTA Silicon Valley Expo & Tech Forum

Boca Raton, FL — November 2026 — Inovaxe, a world leader and provider of innovative material handling and storage systems, announces its participation in the SMTA Silicon Valley Expo & Tech Forum on Thursday, December 3, 2026, at the Fremont Marriott Silicon Valley in Fremont, California. Logan Foster, Sales Engineer, will represent the company and showcase the LS350 Line Side Smart Rack, demonstrating how intelligent material storage can help manufacturers streamline SMT production and improve operational efficiency.

With electronics manufacturers managing increasingly complex production schedules, frequent changeovers and growing component inventories, efficient material handling plays a critical role in keeping assembly lines running smoothly. Inovaxe's intelligent storage solutions are designed to address these challenges by improving inventory visibility, simplifying component retrieval and ensuring materials are readily accessible when needed.

At the expo, Inovaxe will feature its LS350 Line Side Smart Rack, a compact, mobile storage system designed to bring intelligent material management directly to the production floor. With capacity for up to 192 seven-inch component reels, the LS350 keeps frequently used materials organized and accessible at the point of use, reducing time spent locating components and traveling between the stockroom and SMT equipment.

The LS350 is particularly well suited for high-mix manufacturing environments, where rapid changeovers and timely component replenishment are essential to maintaining productivity. By providing organized, line-side access to materials, the system helps minimize production interruptions, reduce unnecessary material movement and support a more efficient workflow.

Beyond convenient component storage, the LS350 supports Inovaxe's broader approach to intelligent inventory management, combining space-efficient hardware with software-driven material tracking and control. This approach helps manufacturers maintain greater visibility into component availability, improve inventory accuracy and reduce the risk of material handling errors.

About Inovaxe Corp.

Inovaxe Corporation is focused on delivering innovative ultra-lean SMART production and inventory management solutions to the electronics industry. The Company's product offering includes mobile InoAuto Smart carts (IA series), Smart racks (SR series), Line Side racks (LS Series) and Smart stationary racks (SREX series) to store SMT reels, tubes, trays, cut tape and loose parts. We provide a Smart MSD cabinet (IMSD) for moisture sensitive device storage and a Smart stencil rack storage solution (SRS series). We offer a material planning/kitting management tool with our InoAuto inventory management software for storing, locating and picking components.
