FOR IMMEDIATE RELEASE

Inovaxe to Showcase LS350 Smart Rack at SMTA Space Coast Expo & Tech Forum

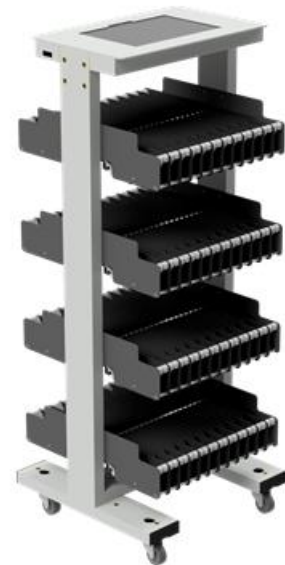

Boca Raton, FL — October 2026 — Inovaxe, a world leader and provider of innovative material handling and storage systems, announces that it will exhibit at the SMTA Space Coast Expo & Tech Forum on Thursday, November 12, 2026, at the Melbourne Auditorium in Melbourne, Florida. David Ly, Technical Sales Manager, will represent the company and demonstrate its LS350 Line Side Smart Rack, while also presenting videos highlighting Inovaxe's broader portfolio of intelligent material storage and handling solutions.

As electronics manufacturers face increasing demands for production flexibility, inventory accuracy and operational efficiency, effective material management has become essential to maintaining productivity. Inovaxe addresses these challenges through intelligent storage systems designed to streamline component handling, improve traceability and ensure materials are available when and where they are needed.

A key highlight of the exhibit will be the LS350 Line Side Smart Rack, an intelligent storage solution engineered to support just-in-time material replenishment directly at the SMT production line. Designed to accommodate up to 192 seven-inch component reels, the LS350 provides convenient access to critical materials while minimizing operator travel between the stockroom and production equipment.

Its compact, mobile design makes the LS350 particularly valuable for high-mix manufacturing environments, where frequent product changeovers and component replenishment can affect production efficiency. By positioning materials closer to the point of use, the system helps manufacturers reduce unnecessary handling, improve material availability and maintain a more consistent production flow.

In addition to demonstrating the LS350, David will share videos showcasing Inovaxe's extensive range of intelligent storage technologies. These solutions address material management requirements throughout the manufacturing process, from high-density stockroom storage and inventory tracking to line-side replenishment and component traceability.

Inovaxe's approach to material management emphasizes real-time inventory visibility, efficient space utilization and simplified component retrieval. By integrating intelligent storage with software-driven inventory control, the company helps electronics manufacturers reduce material handling errors, optimize available floor space and improve overall operational efficiency.

About Inovaxe Corp.

Inovaxe Corporation is focused on delivering innovative ultra-lean SMART production and inventory management solutions to the electronics industry. The Company's product offering includes mobile InoAuto Smart carts (IA series), Smart racks (SR series), Line Side racks (LS Series) and Smart stationary racks (SREX series) to store SMT reels, tubes, trays, cut tape and loose parts. We provide a Smart MSD cabinet (IMSD) for moisture sensitive device storage and a Smart stencil rack storage solution (SRS series). We offer a material planning/kitting management tool with our InoAuto inventory management software for storing, locating and picking components.
