Inovaxe to Showcase Intelligent Material Storage and Traceability Solutions at SMTA International 2026

Boca Raton, FL — September 2026 — Inovaxe, a world leader and provider of innovative material handling and storage systems, will showcase its latest solutions for intelligent material storage, traceability and inventory management at SMTA International 2026. Visitors to **Booth 2817** will have the opportunity to learn more about InoHD™, MODI traceability solutions and Inovaxe's Smart Stencil Rack.

Leading the showcase will be **InoHD™, Inovaxe's High-Density SMT Storage System**, designed to transform the way electronics manufacturers manage valuable production floor space and material inventory. Combining servo-driven mobile shelving with Inovaxe's proprietary smart sensing and pick-to-light technology, InoHD eliminates traditional storage aisles while providing fast, intelligent access to SMT materials.

InoHD can store up to **10,560 SMT reels in just 32 square feet (3 square meters)**, with operators able to retrieve reels in less than four seconds and return them in under eight seconds while inventory is automatically verified in real time. By centralizing inventory and reducing operator travel, the system can reduce material handling labor by up to 80 percent while supporting the speed and flexibility required in high-mix, high-volume manufacturing environments.

Integrated smart sensing and pick-to-light guidance help eliminate picking errors, improve inventory accuracy and reduce production downtime caused by misplaced materials. The modular system can integrate with MES and ERP platforms, allowing it to scale alongside changing production requirements.

Also featured at Inovaxe's booth will be **MODI traceability solutions**. Inovaxe is the exclusive North American partner for MODI solutions through its strategic distribution agreement with DiVis GmbH, enabling manufacturers to extend visibility and control from incoming goods through smart storage and the wider production process. MODI's camera-based incoming goods scanning technology supports efficient material identification and traceability within digitally connected manufacturing environments.

Completing the featured line-up will be Inovaxe's **Smart Stencil Rack**, part of the company's intelligent storage portfolio. Designed to bring greater organization, visibility and control to stencil storage, the system supports Inovaxe's wider approach to ultra-lean material and inventory management across electronics manufacturing operations.

Representing Inovaxe at SMTA International will be **Jim Dickerson, Sr. Vice President of Sales; David Ly, Technical Sales Manager; Angelo Panagopoulos, Director of Business Development; and Logan Foster, Sales Engineer**. The team will be available throughout the event to discuss manufacturers' material handling, storage and traceability requirements.

Visitors are invited to stop by **Booth 2817** to explore how Inovaxe's connected solutions can help improve material visibility, maximize floor space, reduce handling time and support more efficient electronics manufacturing operations.

###

About Inovaxe Corp.

Inovaxe Corporation is focused on delivering innovative ultra-lean SMART production and inventory management solutions to the electronics industry. The Company's product offering includes mobile InoAuto Smart carts (IA series), Smart racks (SR series), Line Side racks (LS Series) and Smart stationary racks (SREX series) to store SMT reels, tubes, trays, cut tape and loose parts. We provide a Smart MSD cabinet (IMSD) for moisture sensitive device storage and a Smart stencil rack storage solution (SRS series). We offer a material planning/kitting management tool with our InoAuto inventory management software for storing, locating and picking components. For more information and a demonstration of Inovaxe product offerings, visit www.inovaxe.com.
