For Immediate Release

Insight Polymers & Compounding Attains ISO 9001 Certification

ISO 9001:2015 certification validates the company's documented quality management systems and bolsters customers' confidence in the supply chain.

KINGSPORT, Tenn., Nov. 12, 2026 – Insight Polymers & Compounding, a leading innovator of advanced polymer compounds, has received ISO 9001:2015 certification, validating its quality management systems and inspiring customer confidence in its products and services. The company met the quality management systems requirements for "design and manufacture of polymer composite solutions and high-performance polymer composites in various industries including Additive Manufacturing, Industrial, Electrical, Electronics and Healthcare."

"Certification confirms that our systems and processes meet ISO standards and the quality levels our customers expect," said A.J. Pasquale, Insight Polymers co-founder and director of operations. "It assures our customers that they are working with a supplier whose systems and processes support their supply chain."

ISO certification is about more than quality, Pasquale noted. “It requires documented processes, work instructions, traceability and training for our staff and operators,” he explained. “That discipline creates an organized, controlled process, which secures our supply chain and gives our customers confidence in both our quality management systems and our custom, high-performance polymers and compounds.”

For more information, please contact Matt Torosian, Insight Polymers sales and market development manager mtorosian@insightpolymers.com.

About Insight Polymers

Insight Polymers & Compounding is a polymer processing and custom compounding operation in Northeast Tennessee focused on fully formulated systems, product development services and proprietary masterbatches. The company understands not only the engineering but the chemistry involved in polymeric materials, processing, testing and evaluation. Insight Polymers was founded and is managed by A.J. Pasquale and Jeremy Lizotte, both Ph.D. material scientists. Along with senior staff, they have more than 100 years of industrial experience in polymer materials including formulated adhesives and coatings, thermoplastics, elastomers and polymer processing.
