KIC Is Making Ovens Smarter at SMTA Space Coast Expo

San Diego — October 2026 — KIC, a leader in thermal process intelligence for electronics manufacturing, is proud to announce that it will participate in the upcoming SMTA Space Coast Expo & Tech Forum, where attendees can learn how smarter thermal process tools are helping electronics manufacturers simplify profiling, improve oven performance and automate process control. The event will take place on November 12 at the Melbourne Auditorium in Melbourne, Florida.

KIC's approach is built around turning heat into actionable data. From fast, easy temperature profiling and automated recipe optimization to automatic profiling, inspection and process monitoring, KIC technologies help manufacturers get more from their thermal processes with less manual effort.

Solutions on display will demonstrate how manufacturers can shorten setup time, verify oven performance, support traceability requirements and maintain consistent, in-spec production.

Visitors are invited to meet with the KIC team and explore practical ways to make their ovens smarter and their thermal processes easier to manage.
