FOR IMMEDIATE RELEASE**KIC to Bring Heat to Data™ and Automatic Profiling to SMTA International 2026**

San Diego — September 2026 — KIC, a global leader in thermal process technologies with more than 25,000 systems installed worldwide, will exhibit at SMTA International 2026, taking place October 27-29 at the Donald E. Stephens Convention Center in Rosemont, Illinois. Visitors are invited to Booth #2834 to explore KIC's latest innovations in thermal process optimization and Automatic Profiling. KIC General Manager Miles Moreau will also present an educational session as part of the conference's technical program.

At the exhibition, KIC will demonstrate its Heat to Data™ approach, showing manufacturers how to transform thermal process data into actionable

insights that improve product quality, process consistency, and manufacturing efficiency.

Attendees will also experience KIC's Automatic Profiling solutions, which simplify profile verification while reducing manual effort and increasing confidence in every production run. By combining intelligent software, advanced profiling technology, and real-time process analytics, KIC enables manufacturers to maintain tighter process control, improve throughput, and make better-informed production decisions.

As part of SMTA International's "Back to the Basics" educational program, Moreau will present the 30-minute session, "Basics of Profiling." Designed for students, industry newcomers, technical sales professionals, and anyone seeking a stronger understanding of reflow processes, the presentation explains the fundamentals of thermal profiling and demonstrates how accurate profile data supports better process control, improved product quality, and more consistent manufacturing performance.

Whether you're looking to optimize your reflow process, improve traceability, or eliminate time-consuming manual profiling, KIC's experts will be available throughout the show to discuss solutions tailored to your manufacturing challenges.

Visit KIC at Booth #2834 during SMTA International 2026 and discover how manufacturers around the world are turning Heat to Data™.

About KIC

KIC is a global leader in thermal process technologies for electronics manufacturing. With more than five decades of innovation, KIC helps manufacturers improve thermal process control, product quality, and manufacturing performance through intelligent profiling and data-driven process optimization.
