KYZEN to Highlight AQUANOX Cleaning Chemistries and Longer Bath Life at SMTA Guadalajara

NASHVILLE — September 2026 — KYZEN, the global leader in innovative environmentally responsible cleaning chemistries, will exhibit at SMTA Guadalajara Expo and Tech Forum, scheduled to take place October 7-8 at Expo Guadalajara Salón Jalisco, Halls D & E. KYZEN's Mexico team of cleaning experts will be on-site at Booth 402 to provide information about the award-winning line of AQUANOX® aqueous electronics cleaning chemistries and the benefits of prolonged bath life.

The AQUANOX line of aqueous cleaning chemistries is formulated to remove a variety of challenging solder flux residues, including no-clean fluxes, from an array of electronic assemblies. With solutions designed to provide long bath life and consistent cleaning performance, AQUANOX chemistries help manufacturers maintain a stable and reliable cleaning process.

Prolonged bath life allows electronics manufacturers to run a more cost-effective process while reducing the frequency of chemistry bath changeouts. By maintaining consistent cleaning performance for longer process times and limiting bath turnovers, manufacturers can improve process stability while reducing chemistry consumption, decreasing production downtime and reducing the total process cost of their cleaning operation.

For more than 35 years, KYZEN has developed innovative cleaning chemistries and process solutions to help electronics manufacturers achieve reliable cleaning results while improving process efficiency.

KYZEN invites SMTA Guadalajara attendees to Booth 402 to connect with KYZEN's cleaning experts to learn more about the AQUANOX line and calculate the cost of reliability and success within your cleaning process.

About KYZEN

KYZEN is a global leader in providing environmentally responsible, RoHS compliant precision cleaning chemistries for industries ranging from electronics and advanced packaging to metal finishing and aerospace applications. Since its founding in 1990, KYZEN's innovative cleaning technologies, scientific expertise and customer support have been repeatedly recognized with the industry's most prestigious awards. For more information, visit www.kyzen.com.
