MicroCare Welcomes Joe Guitar as Director of Operations

Experienced operations leader brings a strong background in manufacturing, engineering, team development and continuous improvement.

NEW BRITAIN, CT – November 2026 – MicroCare, LLC is pleased to welcome Joe Guitar as Director of Operations, Denver. Guitar joined MicroCare in August 2026 and brings nearly 20 years of experience in manufacturing operations, engineering, production management and continuous improvement.

Guitar has a strong background in developing high-performing teams, improving manufacturing processes and driving operational efficiency. Before joining MicroCare, he served as Director of Operations at RoadGuard, overseeing operations across the Western United States, including project execution, engineering, quality and team development.

Previously, Guitar spent nearly eight years at Medtronic, where he held leadership positions as Production Manager and Senior Value Stream Leader. He also spent nearly a decade at La-Z-Boy, progressing through roles in continuous improvement engineering, continuous improvement management and production management.

Throughout his career, Guitar has focused on building collaborative teams, solving operational challenges and creating processes that support productivity, quality and business growth.

"Joe brings valuable manufacturing and operations leadership experience to MicroCare," said Sean Gallimore, COO at MicroCare. "His background in continuous improvement, team development and production management will help strengthen our operations and support the company's continued growth."

"Over the past few months, I've had the opportunity to get to know the MicroCare team, learn more about the business and see firsthand the expertise and dedication that go into supporting our customers," said Guitar. "I'm excited to be part of the team and look forward to building on

that foundation, finding opportunities to improve our operations and helping position the company for continued growth."

Guitar holds a Bachelor of Science degree in Engineering from Michigan State University and a Master of Engineering Management from Washington University in St. Louis.

About MicroCare

MicroCare is a global manufacturer of specialty cleaning, coating and lubrication solutions for critical applications. Its products serve the electronics, medical device, fiber optics, and industrial manufacturing markets. MicroCare combines specialized chemistry, technical expertise and customer support to help manufacturers improve processes, product quality and reliability.
