PROMATION Launches PCB Depaneling TTR-400 Work Cell

KENOSHA, WI – PROMATION Inc. President & CEO Gary Goldberg announces the release of a new table top “PCB Depaneling” (TTR-400) work cell using a high speed spindle and servo gantry.

The TTR-400 is a premium solution for routing Multi-Up PCB panels up to 400 mm x 400 mm. The work cell comes with an integrated Universal fixture and PCB standoffs, eliminating the need for custom fixtures.

The industrial PC (WIN 11) is also MES ready and remote support is available through PROMATION’s I/O & Motion control platform system.

Other features include: PCB mapping for on-screen programming, Vision/Fiducial (color camera), Servo Gantry, Routing Simulator, Powerful downdraft air flow for debris removal, auto bit change, bit detection, bit indexing, bit waste bin, and much more.

For more details contact your local area representative or reach out to PROMATION directly at Sales@PROMATIONUSA.com or (262) 764-4832.
