PVA Launches DeltaFlex™, a Large-Format Coating and Dispensing Platform for Complex Manufacturing Applications

HALFMOON, NY – September 2026 – PVA, a global supplier of automated dispensing and coating equipment, announced the launch of the **DeltaFlex™**, a next-generation large-format dispensing and coating platform engineered for oversized, complex, and high-reliability applications.

THE FUTURE OF FLUID DISPENSING

Introducing the
DeltaFlex

STABILITY | ACCURACY | FLEXIBILITY | SPEED

Built on more than 30 years of dispensing and automation expertise, the DeltaFlex combines the flexibility of PVA's proven Flex Cell platform with new motion architecture designed to meet the evolving demands of modern manufacturing. The platform delivers the precision, scalability and performance required for applications across aerospace, defense, EV battery manufacturing, telecommunications, industrial electronics and electronics manufacturing services.

Designed to accommodate larger assemblies and heavier process equipment without sacrificing accuracy, the DeltaFlex features a ruggedized gantry, dual-driven Y-axis, linear encoder positioning, and high-speed motion capability. Standard 800 and 1200 mm workspaces, increased Z-axis travel, and custom oversized configurations provide manufacturers with the flexibility to support changing products and future production requirements.

"As assemblies continue to grow in size and complexity, manufacturers need automation that can keep pace," said Rod Kasperson, PVA's Vice President of Sales & Marketing. "The DeltaFlex combines the flexibility our customers have always valued from PVA with a new level of performance, scalability, and precision to help them meet the next generation of manufacturing challenges."

The DeltaFlex will make its debut at **The Battery Show North America** at PVA **Booth 6405** in Detroit, MI, October 13-15, 2026 and will also be featured at **The ASSEMBLY Show** at PVA Booth **1117** in Rosemont, IL, October 27-29, 2026.

For more information about DeltaFlex and PVA's complete portfolio of dispensing, coating, and automation solutions, contact PVA at info@pva.net or (518) 371-2684, or visit www.pva.net.

About

PVA's customer driven solutions are utilized worldwide in applications for printed circuit assembly, semiconductor packaging, medical device manufacturing, telecommunications, solar, and consumer electronics. Throughout the changing global manufacturing landscape, from laboratory applications to advanced production systems, PVA provides technologies that deliver unmatched precision and reliability.
