FOR IMMEDIATE RELEASE

RBB to Highlight Contract Manufacturing Capabilities at Greater Ohio Design-2-Part

WOOSTER, OH — October 2026 — RBB, a trusted leader in electronics manufacturing since 1973, RBB is pleased to announce that it will exhibit at the 2026 Greater Ohio Design-2-Part Show, taking place October 28-29 at the First Financial Center (Duke Energy Convention Center) in Cincinnati, OH. RBB will be located in Booth 431, where representatives will be available to discuss the company's contract manufacturing capabilities and connect with manufacturers seeking reliable production partners.

The show provides RBB with an opportunity to meet with new and prospective customers requiring printed circuit board assembly (PCBA), control panel, wire harness and box build services. RBB will showcase its ability to support customers across a range of assembly and manufacturing requirements, from individual assemblies to more comprehensive electromechanical builds.

"Design-2-Part is an excellent opportunity for us to meet face-to-face with companies looking for a capable contract manufacturing partner," said Carrie Guenther, Sales & Marketing Manager at RBB. "We look forward to discussing customers' specific manufacturing requirements and demonstrating how RBB can support their projects with PCBA, control panel, wire harness and box build capabilities."

In addition to meeting prospective customers, RBB will use the event as an opportunity to strengthen connections with USA Firmware, its design partner. Collaboration between design and manufacturing partners can help streamline the transition from product development into production, providing customers with a more coordinated approach to bringing their products to market.

For more information about RBB and its PCBA services, visit www.rbbsystems.com.
