FOR IMMEDIATE RELEASE

RBB to Highlight Flexible Contract Manufacturing at PCB Carolina 2026

WOOSTER, OH — October 2026 — RBB, a trusted leader in electronics manufacturing since 1973, RBB is pleased to announce that it will exhibit at PCB Carolina 2026 on November 11 at the McKimmon Center at NC State, 1101 Gorman St., Raleigh, NC 27606. RBB will be located in Booth 61 and will serve as both a Grand Prize Sponsor and Silver Sponsor of the event.

During the event, RBB will connect with manufacturers seeking solutions to their PCB assembly and electronics manufacturing challenges, with a particular focus on supporting low- and medium-volume customers.

Representatives will be available to discuss production requirements, manufacturing challenges and opportunities to improve the efficiency and reliability of PCB assembly operations.

“Low- and medium-volume manufacturing customers can face some very specific challenges when it comes to finding the right production partner,” said Carrie Guenther, Sales & Marketing Manager at RBB. “We want to help companies find practical solutions to their PCB manufacturing headaches, whether they

need support with an existing assembly or are looking for a partner for a new project. PCB Carolina gives us a great opportunity to have those conversations directly with the people responsible for getting products built.”

RBB’s contract manufacturing capabilities include printed circuit board assembly (PCBA), control panels, wire harnesses and box builds, enabling the company to support customers with a range of electronic and electromechanical manufacturing requirements.

As a Grand Prize and Silver Sponsor, RBB is also supporting PCB Carolina’s efforts to bring together electronics manufacturing professionals from across the region. The event provides opportunities for attendees to connect with manufacturing suppliers, explore technologies and services, and discuss challenges facing today’s PCB industry.

For more information about RBB and its PCBA services, visit www.rbbsystems.com.
