Semi-Kinetics Earns Two Global Technology Awards for Manufacturing Excellence and Smart Factory Advancement

LAKE FOREST, CA — October 2026 — Semi-Kinetics, a leading provider of electronic manufacturing services, is proud to announce that it received two 2026 Global Technology Awards, earning recognition in the Contract Services $50-100 Million category and the Most Improved Smart Factory category. The awards were presented during the Global Technology Awards ceremony held on Tuesday, October 27, 2026, at SMTA International in Rosemont, Illinois.

Semi-Kinetics was honored for its continued commitment to delivering high-quality electronics manufacturing services while also making significant advancements in smart manufacturing technologies, automation, and data-driven production processes.

The company's recognition in the Contract Services $50–100 Million category reflects its ability to provide reliable, scalable electronics manufacturing solutions supported by experienced engineering teams, advanced production capabilities, and a strong focus on customer collaboration. The Most Improved Smart Factory award highlights Semi-Kinetics' ongoing investment in digital transformation initiatives designed to enhance operational visibility, improve efficiency, and optimize manufacturing performance.

"We are honored to receive these two Global Technology Awards, which recognize both our manufacturing capabilities and our continued journey toward becoming a smarter, more connected factory," said Michael Wayne Leedom, President and CEO of Semi-Kinetics. "These achievements are a direct result of the dedication and innovation of our entire team. We remain focused on investing in the technologies, processes, and people needed to provide our customers with exceptional quality, responsiveness, and manufacturing excellence."

From design to delivery, Semi-Kinetics continues to evolve its processes and expand its offerings to support customers looking for reliable, high-quality manufacturing solutions.

Semi-Kinetics is a leading electronics manufacturing services (EMS) provider specializing in high-reliability, complex assemblies for a wide range of industries. With decades of experience, the company provides comprehensive manufacturing solutions including engineering support, PCB assembly, box build, testing, supply chain management, and advanced production capabilities. Through continuous improvement and investment in smart factory technologies, Semi-Kinetics helps customers bring innovative products to market with confidence.

Since 2005, the prestigious Global Technology Awards have recognized the absolute best new innovations in the printed circuit assembly and packaging industries. It brings together the global SMT and advanced packaging industry in a celebration of the companies and people that are achieving the highest standards and driving our industry forward. About Semi-Kinetics
Semi-Kinetics is a leading provider of electronics manufacturing services, specializing in surface mount technology (SMT) and through-hole assembly. With a focus on innovation, quality, and customer satisfaction, Semi-Kinetics offers a comprehensive range of manufacturing solutions to meet the diverse needs of its clients. Leveraging state-of-the-art equipment, experienced personnel, and stringent quality control measures, Semi-Kinetics delivers high-quality products with unmatched precision and efficiency. From prototyping to high-volume production, Semi-Kinetics is committed to exceeding customer expectations and driving success in the electronics industry.
