FOR IMMEDIATE RELEASE

SMarTsol Technologies to Spotlight Leading SMT Manufacturing Solutions at SMTA International 2026

SMarTsol Technologies will showcase a portfolio of advanced SMT manufacturing technologies from industry-leading partners Creative Electron, ASMPT and BTU at SMTA International 2026. Visitors to Booth 2935 will have the opportunity to explore the latest innovations in X-ray inspection, placement, printing and reflow technology, while learning more about SMarTsol Technologies' expanding presence through its new Dallas facility.

Representing ASMPT, SMarTsol Technologies will highlight the SIPLACE V and SIPLACE SX placement platforms alongside the DEK TQ printing solution. Together, these technologies deliver high-speed, flexible SMT production while supporting intelligent factory initiatives, advanced automation and improved manufacturing efficiency.

From Creative Electron, visitors can discover the TruView™ Prime, TruCount and TruView™ Novus solutions. The portfolio combines powerful benchtop X-ray inspection with intelligent inventory management and offline inspection capabilities, helping manufacturers improve product quality, traceability and process control.

SMarTsol Technologies will also feature BTU's Aurora Vacuum Reflow Oven, designed to meet the growing demands of advanced electronics manufacturing. Engineered for applications including data centre hardware, heavy board processing and advanced packaging applications, Aurora delivers precise thermal performance and vacuum capability to support the highest levels of solder joint quality and reliability.

In addition to its technology portfolio, SMarTsol Technologies will highlight its new Dallas facility, strengthening its ability to provide sales, technical support and customer service to customers across North America. The expansion reflects the company's continued commitment to supporting manufacturers with local expertise and responsive service.

Visitors are invited to stop by Booth 2935 to meet the SMarTsol Technologies team, explore the latest SMT manufacturing technologies and discuss solutions tailored to their manufacturing requirements.
