FOR IMMEDIATE RELEASE

SP Manufacturing to Showcase End-to-End EMS Capabilities at Medical Manufacturing Asia 2026

Singapore — September 2026 — SP Manufacturing Pte Ltd., a leader in comprehensive electronic manufacturing services, will exhibit at Medical Manufacturing Asia 2026, taking place September 9-11, 2026, at Marina Bay Sands in Singapore. The company will showcase its comprehensive manufacturing capabilities and demonstrate how its integrated approach can support medical technology companies from product development through final assembly and quality validation.

Located at Booth 2V13, SP Manufacturing will highlight a range of capabilities designed to help customers develop, manufacture and deliver complex products efficiently and reliably. The company's offerings include Product Development and Design for Manufacturability (DFM), Cable and Wire Harness

Assembly, PCBA, Full Box Build and Final Assembly, Testing and Quality Validation, Engineering Support, Mechanical Assembly, HMI and Die-Cut Solutions.

Medical technology manufacturers face increasingly complex product requirements, from sophisticated electronic assemblies and interconnected systems to demanding quality and reliability expectations. SP Manufacturing's integrated EMS capabilities are designed to provide customers with a streamlined manufacturing resource capable of supporting multiple stages of the product lifecycle.

At Medical Manufacturing Asia, the company will emphasize its ability to collaborate with customers early in the product development process through engineering support and DFM expertise. By considering manufacturability during the design stage, SP Manufacturing can help customers identify opportunities to improve production efficiency and create products that are better suited for scalable manufacturing.

The company's PCBA, cable and wire harness assembly, box-build and final assembly capabilities further enable SP Manufacturing to support complex products through multiple manufacturing stages. Complementary testing and quality validation services provide additional support for customers seeking consistent, reliable production and comprehensive quality control.

SP Manufacturing will also highlight its mechanical assembly, HMI and die-cut solution expertise, offering customers access to a broader range of manufacturing capabilities through a single partner. This integrated approach can help simplify supply chains, improve coordination between manufacturing processes and provide greater continuity from component-level production through completed assemblies.

Visitors to Booth 2V13 will have the opportunity to meet with the SP Manufacturing team, discuss current and upcoming projects, and learn more about how the company can support their manufacturing and supply chain requirements.
