FOR IMMEDIATE RELEASE

SP Manufacturing Celebrates Successful SEMICON West 2026

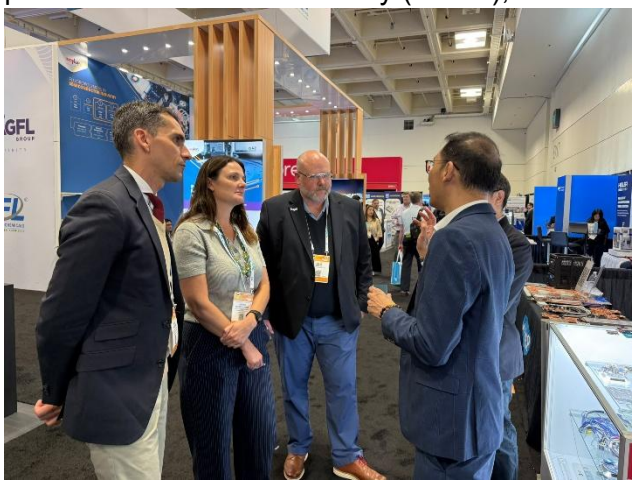

Singapore — November 2026 — SP Manufacturing Pte Ltd., a leader in comprehensive electronic manufacturing services, announces the successful conclusion of its participation at SEMICON West 2026, held October 13-15 at the Moscone Center in San Francisco, California. The event provided an excellent opportunity for SP Manufacturing to connect with industry professionals, strengthen relationships, and showcase its integrated manufacturing solutions to customers and partners across the semiconductor and electronics manufacturing industries.

Throughout the three-day event, the SP Manufacturing team welcomed visitors to Booth 6811, engaging in productive discussions about evolving manufacturing requirements, industry challenges, and opportunities for collaboration.

“SEMICON West 2026 was a tremendous opportunity to connect with customers, industry partners, and new contacts who share our commitment to innovation, quality, and manufacturing excellence,” said Jackson Tan, Global Business Development Director, SP Manufacturing. “We sincerely thank everyone who visited our booth and took the time to speak with our team. We greatly value these conversations and look forward to building on the relationships established during the show, exploring new opportunities, and working together to address the industry's evolving manufacturing needs.”

During the event, SP Manufacturing highlighted its comprehensive manufacturing capabilities, including printed circuit board assembly (PCBA), wire harness and cable assembly, box build, Human Machine Interface (HMI) solutions, and advanced testing services. These integrated offerings enable customers to streamline production, simplify supply chain management, and work with a single trusted manufacturing partner from prototyping through full-scale production.

The company also emphasized its commitment to quality, manufacturing consistency, and reliable performance, supported by rigorous inspection and testing processes. With a global manufacturing presence and expertise serving demanding industries, including semiconductor capital equipment, aerospace, medical, automotive, and industrial electronics, SP

Manufacturing continues to position itself as a strategic partner for customers seeking flexible, high-quality manufacturing solutions.
