FOR IMMEDIATE RELEASE

The D-Code Podcast Returns to the Show Floor at SMTA International with Key Industry Experts

ROSEMONT, IL — September 2026 — The D-Code Podcast, the freshest voice in Printed Circuit Board Assembly (PCBA) and electronics manufacturing, is bringing its unique blend of industry conversations, expert insights, and behind-the-scenes stories to SMTA International 2026. Attendees can find the D-Code crew at Booth 2413, where they'll be recording live episodes, welcoming special guests, and connecting with the people shaping the future of PCBA and electronics manufacturing. Stop by to join the conversation, share your perspective, and experience the podcast in action.

Left to right: Elias Malfavon, Daniel Stanphill, Paul Stanphill, Sean Kincaid

Since launching, The D-Code Podcast has become a favorite among electronics manufacturing professionals by combining technical discussions with honest conversations and a healthy dose of humor. Hosted by industry veterans who aren't afraid to ask questions, challenge conventional thinking, and have a little fun along the way, the podcast continues to explore the people, technologies, and trends shaping the future of electronics manufacturing.

Throughout SMTA International, Booth 2413 will serve as a live recording studio, featuring interviews with industry experts, manufacturing leaders, equipment suppliers, and engineers from across the electronics assembly community. Discussions will cover topics ranging from emerging technologies and manufacturing challenges to workforce development and the future of PCB assembly.

"We've always believed the best conversations happen when people get together and simply start talking," said Elias Malfavon, co-host of The D-Code Podcast. "SMTA International brings together some of the brightest minds in electronics manufacturing, so it's the perfect place to hear new ideas, ask questions, and record conversations that our listeners can learn from long after the show ends."
