FOR IMMEDIATE RELEASE

Explore TRI's Test and Inspection Solutions at SMTA Silicon Valley

[**October 28, 2026 – Fremont, California**] Test Research, Inc., the leading test and inspection systems provider for the SMT industry, announces that it will exhibit at the SMTA Silicon Valley on December 3 in Fremont, California.

Visit our stand to discover TRI's industry-leading inspection solutions for electronics manufacturing and the Semiconductor and Advanced Packaging Industry.

TRI's optical solutions deliver precise measurements through metrology, supporting a wide range of applications across the electronics sector. Metrology plays a crucial role in accurate measurement and inspection processes, meeting the increasing demand for reliability in critical sectors like automotive and aerospace.

Join us at the SMTA Silicon Valley 2026 to learn how TRI's innovative test and inspection solutions can help to improve your yield rate and increase your production intelligence.
