The Test Connection Inc. (TTCI)'s Design for Testability Services Earn Global Technology Award

Baltimore, MD – October 2026 – The Test Connection Inc. (TTCI), a trusted provider of electronic test and manufacturing solutions for more than 45 years, is honored to announce that its Design for Testability (DFT) services received a 2026 Global Technology Award in the Test Services category. The award was presented during the Global Technology Awards ceremony held on Tuesday, October 27, 2026, at SMTA International in Rosemont, Illinois.

The Test Connection was recognized for its comprehensive Design for Testability (DFT) services, which help electronics manufacturers improve product quality, increase test coverage, and reduce manufacturing costs by identifying potential test challenges early in the design process. By collaborating closely with customers during product development, the company's engineering team helps optimize PCB designs for in-circuit testing, functional testing, boundary scan, and manufacturing efficiency, resulting in faster product launches and improved long-term reliability.

"We are honored to receive this Global Technology Award recognizing our Design for Testability services," said Bert Horner, President of The Test Connection, Inc. "DFT is one

of the most valuable investments manufacturers can make because it helps prevent costly issues before production begins. This award reflects our team's dedication to helping customers build more testable, reliable products while improving manufacturing efficiency and reducing overall production risk."

The Test Connection, Inc. is a leading provider of electronic test engineering services, specializing in fixture design and manufacturing, DFT, in-circuit test (ICT) development, functional test solutions, boundary scan, flying probe programming, and test strategy consulting. With decades of industry experience, the company partners with electronics manufacturers worldwide to improve product quality, streamline production, and maximize test effectiveness throughout the product lifecycle.

Since 2005, the prestigious Global Technology Awards have recognized the absolute best new innovations in the printed circuit assembly and packaging industries. It brings together the global SMT and advanced packaging industry in a celebration of the companies and people that are achieving the highest standards and driving our industry forward. About The Test Connection Inc.

The Test Connection Inc. (TTCI) is a leading provider of electronic test and manufacturing solutions, serving a diverse range of industries. With a strong commitment to quality and innovation, TTCI also believes in giving back to the community through meaningful charitable initiatives. For more information, visit www.ttci.com.
