The Test Connection Inc. (TTCI) to Exhibit at Keysight User Group Mexico 2026

Baltimore, MD – August 2026 – The Test Connection Inc. (TTCI), a trusted provider of electronic test and manufacturing solutions for more than 45 years, is pleased to announce its participation in the Keysight User Group (UGM) Mexico, taking place on August 20, 2026, in Guadalajara, Jalisco, Mexico.

TTCI will be represented by Bert Horner, President of The Test Connection, Inc., along with Arnoldo Gomez and Margarito Silos of USM Representatives, who support customers throughout Mexico. Together, they will be available throughout the event to discuss how TTCI's expertise in Keysight 3070 In-Circuit Test (ICT) and complementary manufacturing test technologies helps electronics manufacturers improve product quality, increase production yields, and reduce the total cost of test.

Visitors are encouraged to stop by the TTCI exhibit table to learn how the company develops advanced manufacturing test solutions centered on the Keysight 3070 ICT platform. Leveraging decades of expertise in ICT, TTCI helps electronics manufacturers improve product quality, increase production yields, and reduce the total cost of test. The company also develops complete manufacturing test solutions using Keysight's x1149 Boundary Scan and TS-8900 Series Functional Test platforms. Additionally, the team will be available to discuss Design-for-Test (DfT), legacy test system modernization, production test optimization, and turnkey engineering services for new product introductions.

As electronics assemblies continue to become more complex, manufacturers are under increasing pressure to achieve higher reliability while reducing time-to-market. TTCI works closely with OEMs, EMS providers, and electronics manufacturers to design scalable test solutions that support both high-mix and high-volume production environments. The company's engineering expertise helps customers improve fault coverage, streamline debugging, and maximize the return on their test equipment investment.

“Keysight UGM Mexico provides an excellent opportunity to connect directly with manufacturers and engineers who are focused on improving test effectiveness and production quality,” said Bert Horner, President of The Test Connection, Inc. “We look forward to sharing practical strategies that help companies optimize their manufacturing test operations and support long-term product reliability.”

Keysight UGM Mexico brings together electronics manufacturing professionals, test engineers, and technology leaders to exchange knowledge, explore emerging test technologies, and discuss best practices for modern electronics production. TTCI's participation underscores the company's commitment to supporting customers

throughout Mexico with advanced test engineering expertise and responsive local representation.

TTCI has extensive experience supporting OEMs and EMS providers with scalable test development, fixture design, software integration, and manufacturing test support. By combining deep engineering expertise with industry-leading test platforms, the company helps customers accelerate deployment, improve fault coverage, and achieve more reliable production performance.
