For Immediate Release

The Test Connection Inc. (TTCI) Brings Manufacturing Test Expertise to Keysight UGM in Santa Clara

Baltimore, MD – September 2026 – The Test Connection Inc. (TTCI), a trusted provider of electronic test and manufacturing solutions for more than 45 years, is pleased to announce that it will exhibit at the Keysight Technologies Manufacturing Test User Group Meeting (UGM) on September 16, 2026, in Santa Clara, California.

TTCI will be represented by Bert Horner, President of The Test Connection, Inc. He will be available to discuss test development, implementation and support for a range of Keysight manufacturing test platforms.

The Manufacturing Test USM brings together manufacturing engineers, test professionals and industry leaders to explore the latest developments and practical approaches to electronic manufacturing test. The event will feature technical discussions, customer insights and networking opportunities focused on helping manufacturers address increasingly complex test requirements.

At the event, TTCI will highlight its expertise supporting Keysight test solutions, including the Keysight 3070 In-Circuit Test (ICT) platform, x1149 Boundary Scan Analyzer and TS-89XX Functional Test solutions. TTCI's engineering team helps customers develop and implement test strategies designed to maximize test coverage, improve production efficiency and address the challenges associated with increasingly complex circuit card assemblies.

“TTCI has a long history of helping manufacturers get more from their test platforms through experienced engineering and application support,” said Bert Horner, President of The Test Connection, Inc. “The Keysight Manufacturing Test USM provides an excellent opportunity to connect with other test professionals, exchange ideas and discuss how today's test technologies can be applied to real-world manufacturing challenges. We look forward to meeting with attendees in Santa Clara and sharing our experience with Keysight solutions.”

TTCI has provided test engineering solutions since 1980 and supports a comprehensive range of manufacturing test requirements, including In-Circuit Test, boundary scan and functional test. The company provides test program development, board testing, Design for Test (DFT) services and engineering support to help customers address testability from product development through production.
