## For Immediate Release

### The Test Connection, Inc. (TTCI)'s Test Services Win a 2026 Mexico Technology Award

**Baltimore, MD – September 2026** – The Test Connection Inc. (TTCI), a trusted provider of electronic test and manufacturing solutions for more than 45 years, is honored to receive the 2026 Mexico Technology Award in the Test Services category for its Design for Testability (DFT) capabilities. The award was presented during a ceremony held at before SMTA Guadalajara 2026 on Wednesday, October 7, 2026, in Guadalajara, Jalisco, Mexico.

For more than four decades, TTCI has helped electronics manufacturers improve product quality and manufacturing efficiency by ensuring testability is engineered into every design. As the electronics industry's longest-established independent test engineering company, TTCI provides comprehensive DFT services that optimize test coverage, accelerate production readiness, improve yields, and reduce overall manufacturing costs.

TTCI supports customers throughout the product lifecycle with structured DFT reviews, engineering analysis, boundary scan optimization, CAD-to-test integration, and detailed test specifications for in-circuit, flying probe, boundary scan, and functional test. Using its proprietary Presence, Polarity, Value, and Solder (PPVS) methodology, TTCI predicts test coverage early in the design process, allowing engineers to identify potential gaps before production begins.

Serving high-reliability industries including aerospace, defense, medical, and industrial electronics, TTCI enables customers to reduce risk, shorten debug cycles, and improve collaboration between design and manufacturing teams. By addressing testability early, manufacturers can increase product reliability while reducing non-recurring engineering costs, test development time, and product validation expenses.

“We’ve always believed that successful testing begins long before a board reaches production,” said Bert Horner, President of The Test Connection Inc. “Our Design for Testability methodology helps customers build quality into every stage of the manufacturing process, improving coverage, reducing costs, and delivering more reliable products. We’re honored that the Mexico Technology Awards recognized our team’s commitment to engineering excellence.”

The Mexico Technology Awards recognize the most recent technological innovations in Mexico's manufacturing landscape, spotlighting achievements by OEM manufacturing equipment and materials suppliers over the past year. For more information about the awards, please visit:

###

**About The Test Connection Inc.**

The Test Connection Inc. (TTCI) is a leading provider of electronic test and manufacturing solutions, serving a diverse range of industries. With a strong commitment to quality and innovation, TTCI also believes in giving back to the community through meaningful charitable initiatives. For more information, visit [www.ttci.com](http://www.ttci.com).
