Meet with TTCI – the Electronic Test Solutions Experts – at SMTA Guadalajara 2026

Baltimore, MD – September 2026 – The Test Connection Inc. (TTCI), a trusted provider of electronic test and manufacturing solutions for more than 45 years, is pleased to announce its participation in the upcoming SMTA Guadalajara Expo & Tech Forum, taking place October 7-8, 2026, at Expo Guadalajara, Salón Jalisco Halls D & E. TTCI will exhibit as part of the USM Reps booth 910, connecting with electronics manufacturing professionals from across Mexico and the international electronics industry.

TTCI supports a wide range of industries, including aerospace, defense, medical, automotive, and other high-reliability markets, providing comprehensive test development and turnkey test solutions for high-mix and high-volume production environments. ISO 9001:2015 certified and ITAR

Registered, TTCI combines decades of engineering experience with practical expertise to help manufacturers improve product quality, test coverage, production efficiency, and time-to-market.

Visitors to the USM Reps booth will have the opportunity to explore TTCI's comprehensive portfolio of electronic test engineering services, including:

- In-Circuit Test (ICT) development and board testing for Keysight (Agilent) 3070 and Teradyne TestStation/GR228X platforms
- Flying Probe Testing using Digitaltest MTS-500 and Seica Pilot V8 systems for flexible testing, prototypes, and low-volume production
- Boundary-Scan Testing using JTAG and Keysight x1149 tools for non-intrusive board-level diagnostics and test coverage
- Functional Test Development using platforms such as Keysight TS-5000/TS-8900 and InteFun2700 for comprehensive product validation
- Specialty Test Solutions supporting applications such as LED analysis and microcontroller programming, including the Feasa LED Analyzer and SMH FlashRunner

"TTCI is pleased to return to Guadalajara and connect with manufacturers throughout Mexico," said Bert Horner, President of TTCI. "As electronics manufacturers face increasing demands for quality, reliability, traceability, and production efficiency, our team brings the test engineering expertise needed to

develop practical solutions that fit each customer's unique requirements. From ICT and flying probe to boundary scan and functional test, TTCI helps manufacturers build greater confidence into their products and processes."

With decades of hands-on experience in test engineering and electronics manufacturing, TTCI works closely with customers to develop test strategies that support their specific products, production requirements, and quality objectives. Its engineering expertise can help manufacturers identify test challenges early, improve fault coverage, reduce troubleshooting time, and streamline production workflows.

Attendees can also learn more about The Training Connection LLC (TTC-LLC), TTCI's affiliated organization dedicated to education and workforce development in electronics, Surface Mount Technology (SMT) manufacturing, test engineering, and quality. As an active member of IPC and SMTA, TTC-LLC provides industry-focused training and certification programs designed to help electronics professionals strengthen their technical knowledge and improve manufacturing performance.

With offices in Hunt Valley, MD, Baldwin, MD, and Tampa, FL, TTC-LLC provides access to training programs that help professionals enhance their skills, improve productivity, and stay competitive in a rapidly evolving electronics manufacturing environment.

To schedule a meeting with TTCI at SMTA Guadalajara 2026 or learn more about its electronic test engineering services, visit www.tci.com.
