Shenzhen, China

Wahfei Technology Expands Industrial X-ray, AXI and 3D CT Systems

Wahfei Technology (Wahfei), based in Shenzhen, China, develops industrial X-ray, inline AXI (automated X-ray inspection), and industrial 3D CT systems for non-destructive testing in electronics, new energy, and precision manufacturing.

Its portfolio includes offline X-ray systems, inline AXI for high-volume SMT and component lines, and 3D/CT solutions for internal structure analysis of complex parts such as PCB assemblies, semiconductor packages, capacitors, and battery-related components. Systems are designed to support defect detection, including voids, bridges, and foreign material, with software for imaging and inspection workflows.

Wahfei serves global partners across electronics and manufacturing supply chains. More information is available at https://www.wahfeixray.com/.

About Wahfei Technology

Wahfei Technology is an electronics-manufacturing inspection equipment company headquartered in Shenzhen, China. The company supplies industrial X-ray, inline automated X-ray inspection (AXI), and 3D computed tomography (CT) systems used for non-destructive testing of electronic assemblies and related precision components.
